ABOUT ALAMO1

Alamo 1, a San Antonio, Texas based company with offices along the Gulf Coast, began as a commercial demolition company serving the Central Texas Region and procured a variety of heavy equipment to meet varying project needs and demands. Our personnel have emerged from areas focusing on the response needs of the environmental, chemical, and petroleum industries. The company services have expanded rapidly due to recognition that the new and ever changing environmental regulations would have a significant effect on all industrial and waste activities.

Alamo 1 is a full service environmental contractor that specializes in industrial construction, demolition, remediation, abatement, technical services, waste transportation, emergency response, recycling, health, and safety compliance. Our employees create and utilize innovative technologies to improve employee safety and reduce customer costs. We provide turnkey services for a variety of project scopes. The company's permanent staff includes highly motivated professionals who specialize in various fields, such as remedial technology, waste management, remedial action implementation, project management, and closure services. Alamo1's professional staff has extensive experience related directly to the environmental field. The education and technical training of Alamo 1 personnel covers the full range of environmental disciplines and assures our customers thorough consideration of all critical environmental aspects key to each project.

For almost two decades, our personnel have developed their respective areas of expertise to create one of the leading contractors in the Southwest. Today, Alamo1 has expanded operations to include the entire state of Texas and the Gulf Coast.

ENVIRONMENTAL PROTECTION AND RECYCLING

Alamo1 emphasizes recycling of as much materials as possible from all of its operations. We dismantle simple to complex structures quickly, safely, and with minimal environmental impact. This is always our main goal on all activities. These are some examples of recycling services that Alamo1 provides within each division.

Recycling:

- Reduces disposal volumes
- Reduces transportation costs
- Conserves natural resources
- Secures our competitive pricing on all demolition projects

DEMOLITION DIVISION

Most of the demolition debris that is recovered at each project is then classified and transformed into reusable materials. This process allows us to provide our customers with cost effective solutions, quality, and efficiency.

PETROLEUM DIVISION

Alamo1 collects; stores and processes used oil and other hydrocarbons for their calorific value. We also collect used oil filters for recycling.

REMEDIATION DIVISION

Oil impacted soils are bio-treated and regenerated to render them reusable as backfill.

CONSTRUCTION DIVISION

All the shrubs and brush generated on site clearing operations is mulched and composted for recycling into nature.

Alamo1 has two plant facilities where waste recycling activities occur.

QUALIFICATIONS, EQUIPMENT AND EXPERIENCE

For almost two decades, we have continued to expand resources, capabilities and technologies. The efforts culminating in the formation of Alamo1, a premier full-service environmental services contractor servicing Texas and the Gulf Coast. Alamo1 combined the history, experience, education and energy to the region's finest environmental professionals to address environmental service issues facing businesses, industries, as well as governments.

Alamo1 follows strict quality control and assurance plans on all projects. The quality control activities regularly taken by the project team continually improve quality at every phase of the project. The quality control and assurance program includes provisions for standards, testing, inspecting, identifying as well as corrective actions and documentation controls. Our multi-phase quality control inspections insure adherence to specifications and project requirements. This approach includes inspections of work elements during preparatory, initial and follow-up phases.

EQUIPMENT Company assets include a transportation fleet, heavy equipment, emergency response and spill containment equipment, scientific field instrumentation, and equipment for all levels of personnel protection.

INSURANCE AND BONDING Alamo1 maintains a comprehensive portfolio of insurance coverage, including Contractors Pollution Liability, MCS 90 for hazardous waste transportation, professional liability, general liability, workers compensation, automobile and other special coverage. In addition to extensive insurance coverage, Alamo1 maintains substantial bonding capacity.

SAFETY As part of Alamo1's commitment to safety, we maintain a staff of safety professionals with backgrounds in chemical engineering, industrial hygiene, environmental protection, accident prevention and protection, indoor air quality and ventilation, ionizing and non-ionizing radiation, and remediation. Alamo1 promotes safe work practices via intensive and continual worker training, strict enforcement of the written safety program.

KEY PERSONNEL

Our professional staff includes registered environmental professionals, safety specialist, geologist and chemists. With more than 200 employees on staff, employees are available to respond to incidents and spills of both hazardous and non-hazardous materials. All of our response and field personnel are trained in emergency response, hazardous materials handling, incident command and confined space entry and rescue. We maintain additional personnel to assist with emergency and non-emergency response, project cleanup, and scheduled remediation projects. Individual certifications and resumes are available upon request from the corporate office.

ALEX SALAS - PRESIDENT, CEO

As President and Chief Executive Officer, Mr. Salas provides leadership for the organization's growth and performance at its highest level. He manages all aspects of the company, including its activities and the relationships between the company, its clients, government, industry, community and employees. Mr. Salas develops operating policies and procedures and directs the work of all department managers. He also implements and monitors the budget, monitors the quality of the company's services and ensures maximum client satisfaction. He also secures and protects the company's assets, including facilities and equipment.

TIMOTHY L. BRADEN - DIRECTOR OF FINANCE, CFO

As Treasurer and Chief Financial Officer, Mr. Braden's responsibilities include managing day-to-day, monthly, quarterly and annual accounting department activities; applying generally accepted accounting principles to all activities; processing all invoices and payments to vendors and supervising timely remittances; monitoring, managing and forecasting cash flow; scheduling and directing billing to clients; preparing general ledger and financial statements on a monthly, quarterly and annual basis; monitoring activities of the firm's accounting department; negotiating and maintaining relations with banking and financial institutions and administrating the computerized accounting system.

KEY PERSONNEL

BLAKE CAESAR - DIRECTOR, MUNICIPAL SOLID WASTE

As Director of Municipal Solid Waste, Mr. Caesar coordinates, directs, and monitors operations-related health, safety, and environmental compliance programs, issues, and results. He assists in developing, monitoring, and instituting programs and procedures to ensure environmentally sound, safe, and legal operation of all activities. Mr. Caesar develops and implements policies and procedures necessary to meet requirements of occupational health and safety, corporate health and safety policies, and federal, state, county and/or, local health and safety regulations. Mr. Caesar also develops, implements, and assists in enforcement of policies and procedures to assure a safe workplace for all employees, contractors, and visitors.

RICHARD SCHRIBER - DIRECTOR, REMEDIATION

Richard Schriber supervises and directs construction and environmental remediation services and/or design personnel and clerical staff. He administers and coordinates the work of project staff, contractors, and consultants. Mr. Schriber acts as principal liaison with clients, contractors, and consultants on facilities, studies, or projects. He originates and prepares necessary technical contract data, specifications, drawings, and cost estimates. He also inspects quality and quantity of work; maintains accurate records of work and schedules, and ensures compliance with specifications and regulatory requirements for environmental and construction projects associated with government as well as non-government entities.

WADE HAYDEN - GENERAL COUNSEL

Wade Hayden is general counsel for the company. He also serves as contract administrator, coordinating and reviewing environmental proposals and contracts as well as implementing complete documentation and execution of proposals and awards.

KEY PERSONNEL

BENARD WRIGHT - DIRECTOR, FUEL SERVICES

Mr. Wright is recognized expert in fuel properties and fluid flammability, combustion, and flammability mitigation. He is also a leading scientist in fuel tank flammability and explosivity. He established and supervised experimental laboratory, bench-scale, and full-scale techniques used for characterizing fluid flammability and explosion hazards. He was involved in laboratory fuel tank flammability testing for the FAA and other commercial companies. Mr. Wright has also been involved in hydraulic fluid testing and fluid specification development of fluids such as non-flammable and bio-based fluids. Mr. Wright managed the flammability-testing laboratory that certifies phosphate ester type fluid used in commercial aviation as well as all DoD and commercial fluids. He holds patents in water-emulsion fire resistant hydrocarbon fuels.

STEVE DAUGHERTY - DIRECTOR, ABATEMENT

Mr. Steve Daugherty is located in the San Antonio office of Alamo1, as the Abatement Division Vice President. As Vice President, Mr. Daugherty directs managerial and financial operations of the abatement division on a daily basis. His responsibilities include controlling overall performance and the planning of the direction of the abatement division. With more than 16 years experience, additionally Mr. Daugherty works very closely with the Alamo1 executive team to assure that key client's initiatives are completed in a timely and responsible fashion, allowing the company to deliver the most efficient solutions and services to its clients. He is proficient in the coordination of all site activities with owners, occupants and the various contractors required on these projects.

TERRY DAUGHERTY - VICE-PRESIDENT, DEMOLITION AND RECYCLING

Mr. Daugherty specializes in demolition of commercial and industrial projects and is responsible for the application of company expertise in a variety of areas including waste reduction and recyclables marketing. Utilizing a solid understanding of technical issues and manufacturing processes, his business experience in construction has permitted him a thorough understanding of the cost savings that can be realized through proper waste management. The demolition team offers clients the ability to deconstruct equipment, buildings, and problems through keen insight and knowledge of process systems.
